DEFINITE AND CERTAIN

There are a few things that are definite and certain concerning our relations with Europe.

The United States government is not going to loan any more money to any other nation.

American bankers are not going to loan any more money to any other nation.

The American people are not going to support any more loans to any other nation.

The American people are not going to support any more loans to any other nation.

The American people are not going to support any more loans to any other nation.

The American people are not going to support any more loans to any other nation.

The American people are not going to support any more loans to any other nation.

GERMAN FINANCIAL STRUCTURE

This terse dispatch from Berlin shows concisely what is happening to the German financial structure.

State expenses for six months ended Sept. 30 total 422,000,000 marks and receipts 249,000,000 marks leaving a great deficit which was met by issuing treasury bills.

Deficits are being added to all the time and the money presses are running in an attempt to catch up. Meanwhile the reparations question is still in a tangle making it impossible for the Germans to arrange their affairs. Under the circumstances it would be folly for the United States to attempt to loan government officials and private financiers are of one mind on that point. Until a reparations settlement is reached no relief will be forthcoming from this source.

IMPROVEMENT IN VEIN WIDTH AT NEW CALIFORNIA

Ore Being Broken From Ten Exposures Development Work Under Way

A decided improvement in the width of the vein is the encouraging fact shown by the week's development work at the New California Tonopah Mining company's property. From ten different exposures ore is being mined and shortly a mill run will be made as a test. Ore extractions are being made from the 300, the 400, the 600 and 700-foot levels. The official report for the week ending Dec. 30, follows:

Operations for the week were confined to development on the 500-foot intermediate level and ore extraction from the 300, the 400, the 600 and the 700-foot levels.

The raise on the 500-foot level was advanced 15 feet and temporarily discontinued. The cross-cut on the 500 level was advanced 12 feet and should encounter the faulted segment of the vein which was staked on the 400 level, within the next 20 feet.

Ore is being mined from ten different exposures and a mill run will be made as a test. Assay values of broken ore show an exceptionally good grade and in several instances there is decided improvement in the width of the vein.

The Luning regime has reduced Russia to pastboard rules, which must be rather tough since a man can't even rattle a little change in his pocket to make a bluff. If democratic policies should prevail in the United States we could develop our pin money from our shoe boxes and watch Russians for straw leaves.
